Sound Sense.

We clip the following from the Anderson Intelligencer of last week: Our City Council has taken a step in the right direction in looking closely after the sanitary condition of the city. Nothing conduces more to health than cleanliness, and nothing is more productive of sickness than filth; so it is necessary for the protection of those who do observe sanitary measures, that the careless and indifferent shall be made to as well. If a man sees fit by neglecting to keep his premises clean to invite fever or some other disease, and endanger his own life and the lives of his family, he can blame no one but himself; but he has no right by such negligence to endanger the lives of his neighbors. We hope that the Council will not falter in its work of having the city cleansed. Strict sanitary ordinances strictly enforced, will do a great deal of good.
